

Jewish Geriatric Chaplaincy Training

October 28, 2024 – May 7, 2025

Level IA and B and Level IIA and B CPE
in Geriatrics or Pediatrics

Hebrew Rehabilitation Center, Roslindale

Introduction:

In the last 100 years, Hebrew SeniorLife (HSL) has grown from a small residence for frail elderly in Dorchester to a highly integrated system of housing, day care, and health care with an international reputation. HSL's system encompasses 650 long-term chronic care hospital patients, groundbreaking senior care research (Marcus Institute for Aging Research), palliative and hospice care, rehabilitation services, and home care. HSL serves over 3000 older adults each day.

Hebrew Rehabilitation Center (HRC) is the largest of HSL's institutions, with campuses in Boston (Roslindale) and in Dedham. NewBridge on the Charles, located in Dedham, offers independent and assisted living as well as skilled nursing services and long-term chronic care. The Boston (Roslindale) campus offers long-term care, post-acute care, rehabilitation services, and outpatient specialty services.

This CPE unit will take place at Hebrew Rehabilitation Center (HRC) in Boston (Roslindale). Most students in this unit will be assigned to clinical time on this campus. A few students may be assigned to serve on other HSL campuses. One position is open for a student with previous CPE to do their clinical work at Boston Children's Hospital.

Over 60% of the long-term chronic care patients in Boston are Jewish, with half of these being Jews from the former Soviet Union; in Dedham, closer to 75% are Jewish. Patients on the rehabilitation and post-acute services units on both campuses reflect the more general population of the surrounding communities, including a mix of religions and cultures.

Boston Children's Hospital is a tertiary care, Level I Trauma, medical center located in the Longwood medical area. Patients come from Boston, the rest of the US, and many countries. The acuity of illness is very high. Amongst the patient population is a great diversity of racial, ethnic, and religious backgrounds.

Program Description:

Clinical Pastoral Education (CPE) at HSL provides important formation, skills, and resources for the congregational rabbinate or ministry, and for healthcare chaplains. Chaplain interns support the spiritual and emotional lives of diverse patients and their family members in ways that enhance overall health and wellbeing. Chaplain interns also help the caregiving staff understand the spiritual aspects of their patients' needs, and manage the ongoing emotional demands of the staff's own work. The program provides students with attunement to Jewish religious and cultural approaches to facing the challenges of development, aging, loss, end of life decision making, dementia, and seeking spiritual fulfillment in late life. Special attention is given to the impact on spiritual caregiving of historical trauma, resilience, LGBTQ+ identities, and being nonreligious.

This unit of CPE is aimed at chaplains, congregational clergy, seminary and rabbinical students, and laypersons interested in pursuing spiritual care. English is the predominant language of the educational program, and applicants must be fluent in spoken and written English. Special opportunities are available for Russian-speaking applicants, as a significant portion of HSL residents, patients, and staff speak Russian. Thanks to a generous donor, one position is available for a student who already has completed a unit of CPE to do their clinical work at Boston Children's Hospital; supplemental opportunities to learn about pediatric chaplaincy are provided.
